
Critical Path for Parkinson's Consortium 2017 Annual Meeting

The Critical Path for Parkinson's (CPP) Consortium, cofounded by C-Path and [Parkinson's UK](#), held its second annual consortium member meeting on June 12 in Bethesda, MD. The meeting brought together scientists from the biopharmaceutical industry, academic institutions, and government agencies; people living with Parkinson's; patient-advocacy associations; and U.S. Food and Drug Administration regulators to align on the collaborative ways to increase efficiency, safety, and speed in developing new therapies for Parkinson's.
