

## Steve Broadbent, MBA

Mr. Steve Broadbent currently serves as C-Path Special Operations Advisor and is the organization's former Chief Operating Officer responsible for the daily operations of the organization as well as developing and implementing C-Path's strategy and goals. He managed the organization's finances, human resources and policy regarding personnel, facilities, and information technology. In addition, he also oversaw C-Path's consortia efforts to ensure successful qualification of safety and efficacy biomarkers, disease progression models, patient-reported outcome instruments and other drug development tools.

Before joining C-Path, Mr. Broadbent was an IBM executive with nearly 31 years of experience in storage product development. He managed over 400 engineers in four countries with responsibility for architecting, developing, testing, and supporting IBM's largest and most complex disk storage systems—those used by top businesses and government agencies to store their most important data.

He earned a Bachelor of Science degree in electrical engineering from the University of Idaho and a Master's degree of Business Administration from the Eller College of Management at the University of Arizona. He is also a certified Project Manager.
